1. Introduction

1.1 Ordering and Quoting Tools

Solution Expert assists Cisco field and Cisco Unified Communications specialized channel partners in designing and quoting solutions using the Cisco Unified Communications bundles or the traditional design model. For additional information about Solution Expert, go to: http://tools.cisco.com/a2q/introduction.sx?actionParam=viewIntroduction.

The following Cisco Unified IP Phones 6900, 7900, 8900, and 9900 Series, and the Cisco Unified ATA 180 Series Analog Telephone Adaptor Products and Applications are supported in Solution Expert:

Cisco Unified ATA 187 Analog Telephone Adaptor
Cisco Unified IP Phone 6901
Cisco Unified IP Phone 6911
Cisco Unified IP Phone 6921
Cisco Unified IP Phone 6941
Cisco Unified IP Phone 6945
Cisco Unified IP Phone 6961
Cisco Unified IP Phone 7911G
Cisco Unified IP Phone 7931G
Cisco Unified IP Phone 7942G
Cisco Unified IP Phone 7945G
Cisco Unified IP Phone 7962G
Cisco Unified IP Phone 7965G

Cisco Configuration Tool is part of the suite of Internet Commerce Tools developed by Cisco for managing online ordering of Cisco products. It allows you to configure products and view lead times and prices for each selection. It also allows you to view lead time and price changes under a variety of price lists and service contract terms. You can then save, print, e-mail, and download your configurations. Cisco Configuration Tool is also known as DCT (Dynamic Configuration Tool).

The cisco.com (with password required) version of Cisco Configuration Tool is located at:

Cisco Service Contract Center is an integrated solution that makes it easy for Cisco service sales teams and partners to manage and grow their service business, profitably. It provides these benefits:

- Quote and book your service orders and manage your service contracts and renewals all with one simple, easy-to-use solution.
- Spend less time solving administrative problems, searching for opportunities, and creating quotes.
- Spend more time growing your business using data you can trust; you don't need to spend time fixing or verifying data.

1.2 Orderability and First Customer Ship (FCS)

Orderability for the following products/applications in Cisco Unified Communications System Release 7.1.5 is now available.

The projected First Customer Ship (FCS) date for the following products/applications in Cisco Unified Communications System Release 7.1.5 is as follows:

- Cisco Unified ATA 187 Analog Telephone Adaptor (Shipping)
- Cisco Unified IP Phone 6901 (Shipping)
- Cisco Unified IP Phone 6911 (Shipping)
- Cisco Unified IP Phone 6921 (Shipping)
- Cisco Unified IP Phone 6941 (Shipping)
- Cisco Unified IP Phone 6945 (Shipping)
- Cisco Unified IP Phone 6961 (Shipping)
- Cisco Unified IP Phone 7911G (Shipping)
- Cisco Unified IP Phone 7931G (Shipping)
- Cisco Unified IP Phone 7942G (Shipping)
- Cisco Unified IP Phone 7945G (Shipping)
- Cisco Unified IP Phone 7962G (Shipping)
- Cisco Unified IP Phone 7965G (Shipping)
- Cisco Unified IP Phone 7975G (Shipping)
- Cisco Unified IP Conference Stations 7937G (Shipping)
- Cisco Unified IP Phone Expansion Module 7915 (Shipping)
- Cisco Unified IP Phone Expansion Module 7916 (Shipping)
- Cisco Unified Wireless IP Phone 7921G (Shipping)
- Cisco Unified Wireless IP Phone 7925G (Shipping)
- Cisco Unified Wireless IP Phone 7925G-EX (shipping)
- Cisco Unified IP Phone 9971 (Shipping)
- Cisco Unified IP Phone 9951 (Shipping)
- Cisco Unified IP Phone 8961 (Shipping)
- Cisco Unified IP Color Key Expansion Module (Shipping)
- Cisco Unified Video Camera (Shipping)
- Cisco Unified IP Phone Accessibility (Shipping)
- Jawbone ICON for Cisco Bluetooth Headset (Shipping)

1.3 Purpose, Audience, and Scope

This document describes the pricing and packaging structure and ordering for the Cisco® Unified SIP Phone 3900 Series, the Cisco Unified IP Phones 6900, 7900, 8900, and 9900 Series and the Cisco Unified ATA 180 Series Analog Telephone Adaptor as part of Cisco Unified Communications System Release 7.1.x and later.

Audience—This guide is for Cisco field and Cisco Unified Communications specialized channel partners.

Cisco Unified ATA 187 Analog Telephone Adaptor

Cisco Unified ATA 187 Analog Telephone Adaptor .

The Cisco ATA187-I1-A offers configurable option to set impedance according to each country requirements. Some countries have telephone networks that list multiple impedance requirements. It is important to closely approximate the impedance of the typical handsets used in the region when selecting the proper configuration because an incorrect choice may lead to poor echo-cancellation performance.

For Cisco Unified Communications Manager Versions 7.1(5) and later

ATA187-I1-A=: US$300.00 + $40 Analog UCL*
**For each Analog device attached to the ATA 187.*

Power adapter and power cords are included.

Select from one of the following power cords for your region:

- **ATA187PWRCORD-NA: US$0.00:** ATA Power Supply Cable for North America
- **ATA187PWRCORD-EU: US$0.00:** ATA Power Supply Cable for Continental Europe
- **ATA187PWRCORD-UK: US$0.00:** ATA Power Supply Cable for UK
- **ATA187PWRCORD-AU: US$0.00:** ATA Power Supply Cable for Australia
- **ATA187PWRCORD-IRAM: US$0.00:** ATA Power Adaptor For Argentina
- **ATA187PWRCORD-JP: US$0.00:** ATA Power Supply Cable for Japan
- **ATA187PWRCORD-TWN: US$0.00:** ATA Power Supply Cable for Taiwan
- **ATA187PWRCORD-CCC: US$0.00:** ATA Power Supply Cable for China
- **ATA187PWRCORD-UC: US$0.00:** ATA Power Supply Cable for Brazil
- **ATA187PWRCORD-IND: US$0.00:** ATA Power Supply Cable for India
- **ATA187PWRCORD-MEX: US$0.00:** ATA Power Adaptor For Mexico
- **ATA187PWRCORD-SAUD: US$0.00:** ATA Power Supply Cable for Saudi Arabia
- **ATA187PWRCORD-SAB: US$0.00:** ATA Power Supply Cable for South Africa

CUCM License Info:

With Cisco Unified Communications Manager versions 7.1(5) and later, SIP only, together with the appropriate User Connect Licensing (UCL) as described in the Cisco Unified Communications Manager 8.x User Connect Licensing section.

Cisco Unified IP Phone 6901

The Cisco® Unified IP Phones 6900 Series delivers cost-effective, business-grade voice communication services, and on selected models video communications services, to customers worldwide in a user and eco-friendly ergonomic design.

The IP Phone 6901 is a single-line endpoint. It does not support a display. Designed with a trim-line like low profile, the Cisco Unified IP Phone 6901 is an ideal solution for lobbies, hallways, elevators, hotel bathrooms or other settings where the need for voice communication services are light. The IP Phone 6901 can be locally powered or via 802.3af Power over Ethernet.

The phones can be mounted onto the wall without additional 6900 wall mount kits by leveraging 3rd party telephone wall mount plates, like Leviton 4108W-xSP.

Ordering Information:

For Cisco Unified Communications Manager version 7.1(3) through 7.1(4)

CP-6901-W-K9=: US$90.00 + 2 DLU

Cisco Unified IP Phone 7911G

Enhanced entry-level, one-line IP phone, small monochrome LCD, XML text and audio support with a switched PC port. Supports Cisco inline power, IEEE 802.3af Power over Ethernet (PoE) and, optionally, an exterior power adapter.

Ordering Information:

CP-7911G: US$225.00

Configure one of the following RTU Product/part number:

- **SW-CCM-UL-7911: US$150.00**, for Cisco Unified Communications Manager 4.3 and Cisco Unified CallManager 4.2 or earlier, SCCP only
- **SW-CCME-UL-7911: US$150.00**, for Cisco Unified Communications Manager Express, SIP or SCCP

CP-7911G=: US$225.00

Use this SKU for one of these deployments:

- With Cisco Unified Communications Manager versions 5.0 through 7.1(4), SIP or SCCP, together with 3 units of LIC CM-DL-##0= (For more details, see the Cisco Unified CallManager 5.0 and Cisco Unified Communications Manager 5.1 and 6.0 Device License Units section.)
- With Cisco Unified Communications Manager version 7.1(5) and later, SIP or SCCP, together with $210.00 User Connect Licensing (UCL) as described in the Cisco Unified Communications Manager 8.x User Connect Licensing section.
- As a spare for licensed production, staging or laboratory phones.

Optional power adapters and power cords are sold and packaged separately. For more information, see the Power Adapters and Power Cords sections on this price listing.

Cisco Unified Wireless IP Phone 7921G

The Cisco Unified Wireless IP Phone 7921G is a second-generation Cisco wireless IP phone that now supports dual-band 802.11a/b/g radios, a speakerphone, and has a high-resolution color display. It has dedicated buttons for Push-to-talk support via XML application, volume, and mute. The phone is also Cisco Compatible Extensions (CCX) Version 4.0 compliant. Note: This product is not intended for use with patient monitoring devices or other patient care devices. It should not be used as a primary communications tool in healthcare environments as it may use an unregulated frequency band susceptible to interference from other devices or equipment.

PLEASE NOTE: There is a Country SKU Suffix in the "Regulatory Domain" column adjacent to your country. Be sure your ordering code has the corresponding suffix for your country to ensure proper required power and channel settings. If you have any questions regarding this information, please contract your Cisco Account Manager or Cisco Reseller for more information.

Cisco Unified Wireless IP Phone 7925G

The Cisco Unified Wireless IP Phone 7925G extends the functionality of the Cisco Unfified Wireless IP Phone 7921G and is ideally suited for more demanding environments such as healthcare, manufacturing facilities, warehouses etc. The phone integrates a rugged industrial design with a rubber exterior casing to protect against drops and shocks and meets the military 810-F standard. The phone is also hermetically sealed and IP54 rated for dust and splashed water protection. The display can be wiped down with moist wipes. The phone also supports Bluetooth v2.0 standard headset profiles for expanded personal freedom. It supports dual-band 802.11a/b/g radios, a speakerphone, and has a high-resolution color display. It offers dedicated buttons for Push-to-talk support via XML application, volume, and mute. The phone is also compliant with Cisco Compatible Extensions (CCX) Version 4.0. Note: This product is not intended for use with patient monitoring devices or other patient care devices. It should not be used as a primary communications tool in healthcare environments, as it may use an unregulated frequency band susceptible to interference from other devices or equipment.

Cisco Unified Wireless IP Phone 7925G-EX

The Cisco Wireless IP Phone 7925-EX is ATEX Zone 2 certified. Zone 2 is defined as an area in which an explosive gas atmosphere is not likely to occur in normal operation and if it does occur, is likely to do so only infrequently and will exist for a short period only, (e.g. less than 10 hours/year).

The phone is also CSA Class 1 Division II certified. Class 1 is a location where a quantity of flammable gas or vapor, sufficient to produce an explosive or ignitable mixture, may be present in the air. Division II is a location where a classified hazard does not normally exist but is possible under abnormal conditions.

SKUs

- **CP-7925G-EX-K9=: US$950.00**

Use these SKUs for one of these deployments:

- With Cisco Unified Communications Manager versions 5.0 through 7.1(4), SIP or SCCP, together with 4 units of LIC CM-DL-##0= (For more details, see the Cisco Unified CallManager 5.0 and Cisco Unified Communications Manager 5.1 and 6.0 Device License Units section.)
- With Cisco Unified Communications Manager versions 7.1(5) and later, SIP or SCCP, together with $210.00 User Connect Licensing (UCL) as described in the Cisco Unified Communications Manager 8.x User Connect Licensing section.
- As a spare for licensed production, staging or laboratory phones.

Spare License SKUs

For use with Cisco Unified Call Manager 4.x or earlier or Cisco Unified CallManager Express. Not valid with Cisco Unified CallManager version 5.0 and later (see spare SKUs).

- **SW-CCM-UL-7925G=: US$200.00** Cisco Unified Communications Manager User License for single Cisco Unified Wireless IP Phone 7925G

Cisco Unified IP Phone 7931G—Multibutton IP Phone

The Cisco Unified IP Phone 7931G is a full-featured IP phone providing functions that are commonly needed in the commercial and retail environments. It provides 24 lighted line keys and four interactive soft keys that guide a user through call features and functions. In addition the Cisco Unified IP Phone 7931G provides hard hold, redial and transfer keys to facilitate simple and rapid call handling.

The Cisco Unified IP Phone 7931G includes two RJ-45 jacks each providing 10/100 Base-T connectivity. One connects to the network, the other connects to a PC so both the phone and second device can share a single network connection. The Cisco Unified IP Phone 7931G supports IEEE 802.3af PoE only—no Cisco PoE. The Cisco Unified IP Phone 7931G will be supported on Cisco Unified Communications Manager Express and Cisco Unified Communications Manager Express 4.0(2) in the first release. Cisco Unified Communications Manager 6.0 support is now supported.

Ordering Information:

CP-7931G: US$325.00

Configure one of the following RTU Product/part number:

- **SW-CCME-UL-7931**, for Cisco Unified Communications Manager Express, SIP or SCCP: US$200.00

CP-7931G=: US$325.00

Use this SKU for one of these deployments:

- With Cisco Unified Communications Manager versions 5.0 through 7.1(4), SIP or SCCP, together with 4 units of LIC CM-DL-##0= (For more details, see the Cisco Unified CallManager 5.0 and Cisco Unified Communications Manager 5.1 and 6.0 Device License Units section.)
- With Cisco Unified Communications Manager versions 7.1(5) and later, SIP or SCCP, together with $210.00 User Connect Licensing (UCL) as described in the Cisco Unified Communications Manager 8.x User Connect Licensing section.
- As a spare for licensed production, staging or laboratory phones.

Optional power adapters and power cords are sold and packaged separately. For more information, see the Power Adapters and Power Cords sections on this price listing.

The Cisco Unified IP Phone 7975G offers enhanced functionality for professional worker, manager and administrative assistant communication needs in an office environment with a high amount of phone traffic, while also meeting the needs of power users/developers working with bandwidth-intensive applications on co-located PCs. Additionally, users requiring/preferring vibrant color touchscreen displays for useability reasons or for productivity-enhancing applications will benefit from this top-of-the-line model. It offers a handset and full-duplex speakerphone acoustically designed for support of wideband audio, to enable rich, life-like voice communications. The phone also features a large backlit TFT color touchscreen display for expanded XML-based application possibilities and Asian character support, improved navigation options, and access to eight backlit lines/programmable feature keys and five soft keys.

The Cisco Unified IP Phone 7975G includes two RJ-45 jacks, each providing 10/100/1000 Base-T connectivity. One connects to the network, and the other connects to a PC so both the phone and second device can share a single network connection. The Cisco Unified IP Phone 7975G may be powered locally, or via IEEE 802.3af PoE (Class 3).

Ordering Information:

CP-7975G: US$705.00

Configure one of the following RTU SKUs:

- **SW-CCM-UL-7975: US$250.00,** for Cisco Unified CallManager 4.x or earlier, SCCP only
- **SW-CCME-UL-7975: US$250.00**, for Cisco Unified CallManager Express, SIP or SCCP

CP-7975G=: US$705.00

Use this SKU for one of these deployments:

- With Cisco Unified Communications Manager versions 5.0 through 7.1(4), SIP or SCCP, together with 5 units of LIC CM-DL-##0= (See the Cisco Unified CallManager pricing guide for details)
- With Cisco Unified Communications Manager versions 7.1(5) and later, SIP or SCCP, together with $210.00 User Connect Licensing (UCL) as described in the Cisco Unified Communications Manager 8.x User Connect Licensing section.
- As a spare for licensed production, staging or laboratory phones.

Optional power adapters and power cords are sold and packaged separately. For more information, see the Power Adapters and Power Cords sections on this price listing.

Cisco Unified IP Phone Expansion Module 7915

The Cisco Unified IP Phone Expansion Module 7915 extends the capabilities of the Cisco Unified IP Phones 7962G, 7965G, and 7975G with additional buttons and an LCD display. With this expansion module, you add 12 physical keys with access to 12 additional keys via the page keys for a total of 24 buttons to the existing six buttons of the Cisco Unified IP Phones 7962G and 7965G and the existing eight buttons of the Cisco Unified IP Phone 7975G. You can use up to two Cisco Unified IP Phone Expansion Module 7915's with Cisco Unified IP Phones 7962G, 7965G, or 7975G.

If the supported phone uses inline power, a local power supply must be used for the Cisco Unified IP Phone Expansion Module 7915. If the supported phone is locally powered, the power adapter can also supply power for one Cisco Unified IP Phone Expansion Module 7915. For two Cisco Unified IP Phone Expansion Module 7915s, an additional power supply is required.

A single foot-stand is required for a single Cisco Unified IP Phone Expansion Module 7915. A double foot-stand is required when using two Cisco Unified IP Phone Expansion Module 7915s. Price does not include power supply or foot-stand.

Ordering Information:

CP-7915=: US$395.00

No RTU license required.

Accessories:

CP-SINGLFOOTSTAND=: US$33.00

Required for a single Cisco Unified IP Phone Expansion Module 7915 combined with a supported Cisco Unified IP phone.

CP-DOUBLFOOTSTAND=: US$38.00

Required when using two Cisco Unified IP Phone Expansion Module 7915's combined with a supported Cisco Unified IP phone.

Optional power adapters and power cords are sold and packaged separately. For more information, see the Power Adapters and Power Cords sections on this price listing.

Cisco Unified IP Phone Handset and Handset Cord

For use with any Cisco Unified IP Phone 7900 Series. The cords are 7 ft. (~1.2 m).

Ordering Information:

CP-HANDSET-CORD=: US$5.00

One dark gray spare handset cord

CP-HANDSET=: US$15.00

One dark gray spare handset

Cisco Unified Wideband Handset

The Cisco Unified Wideband Handset can be added to the following Cisco Unified IP Phone models; Cisco Unified IP Phone 7906G, 7911G, 7941G, CP7941G-GE, 7961G, 7961G-GE, 7970G and 7971G-GE. The Cisco Unified Wideband handset is shipped from the facotry on the following Cisco Unified IP Phone models; Cisco Unified IP Phone 7942G, 7845G, 7962G, 7965G and 7975G. Other Cisco Unified IP Phone 7900 Series models do not support the Cisco Unified Wideband Handset.

For point to point Wideband calls, both Cisco Unified IP Phones must be equipped with a Cisco Unified WideBand Handset, and must have the G.722 Wideband codec enabled within the phone and within the network. Cisco Unified Communications Manager 4.1 or greater is required to support the G.722 Wideband codec. Also, the host IP Phone must be loaded with firmware version 8.3(1) or later.

Ordering Information:

CP-WB-HANDSET= US$25.00

The new Cisco Unified Wideband Handset is ordered on a per phone basis.

Cisco Unified IP Phone LAN Cord

One spare Local Area Network (LAN) cable for the Cisco Unified IP Phones 7900, 8900 and 9900 Series. Black, 5 ft. (1.5 m).

Cisco Unified IP Phone 8961

The Cisco Unified IP Phone 8961 offers enhanced functionality for knowledge workers, administrative staff, managers and executive communication needs in an office environment with more active communications needs. The IP Phone 8961 also meets the needs of power users/developers working with bandwidth-intensive applications on co-located PCs with the IP Phone 8961's support of 10/100/1000 Base-T switch ports. The Cisco Unified IP Phone 8961 offers an advanced feature set, including 5 inch VGA color display, 5 session keys and 5 programmable feature keys, High-definition voice for superior audio quality, USB connectivity for wired headsets, Cisco Unified Communications Widgets, applications from the Cisco Unified Application Environment (CUAE), XML and MIDlet-enabled applications for productivity enhancement and greater business value.

The Cisco Unified IP Phone 8961 includes two RJ-45 jacks, each providing 10/100/1000 Base-T connectivity. One connects to the network, and the other connects to a PC so both the phone and second device can share a single network connection. The Cisco Unified IP Phone 8961 may be powered locally, or via IEEE 802.3af PoE (Class 3).

Notes:

- Choice of handset styles: The **Standard handset** weighs 6 oz / 170g and is thicker at the earpiece and mouthpiece than the slimline handset. The **Slimline handset** weighs 5 oz / 140g. As a reference the handset for a Cisco Unified IP Phone 7975G weighs 7 oz / 210g. Standard and Slimline handsets are interchangeable at the customer sites without any change to phone firmware, locale or call control software: handset choices have been made available to cater to end user preferences.
- All of these models are ordered as spares. Licenses are sold separately either as Device License Units (DLUs) for use with Cisco Unified Communications Manager or as spare license SKUs offered for other Cisco call control systems. There are also no special channel bundles for Tier II distributors.
- None of these models are supported for use with non-Cisco third party call control

Cisco Unified IP Phone 9951

The Cisco® Unified IP Phone 9900 Series is a complementary addition to the Cisco Unified portfolio of endpoints that deliver high-performance, executive-grade unified communication voice, video and applications services to customers worldwide in a user and eco-friendly ergonomic design. The IP Phone 9900 series supports Cisco Unified Communications Widgets, applications from the Cisco Unified Applications Environment (CUAE), XML and MIDlet-enabled applications.

The IP Phone 9951 is a five-line IP endpoint that supports High-definition voice for handset, headset and full duplex speakerphone for superior audio performance along with general purpose audio in and audio out ports for external speakers and microphone. IEEE 10/100/1000 switch ports to collocate a PC and a backlit, anti-glare, VGA LCD display. The IP Phone 9951 also natively supports video communications up to 30 frames-per-second, via the Cisco Unified Video Camera, and USB and Bluetooth devices such as headsets. The IP Phone 9951 can be locally powered or via 802.3af Class 3 or 802.3at Power over Ethernet.

Notes:

- Choice of handset styles: The **Standard handset** weighs 5 oz / 170g and is thicker at the earpiece and mouthpiece than the slimline handset. The **Slimline handset** weighs 6 oz / 140g. The IP Phone 9971 also natively supports video communications up to 30 frames-per-second via the Cisco Unified Video Camera for the 9900 Series IP Phone, USB and Bluetooth devices such headsets. The IP Phone 9971 supports 802.11 a/b/g desktop wi-fi ethernet connectivity as well as a standard RJ45 port for wired Ethernet connections. The IP Phone 9971 can be locally powered or via 802.3af Class 3 or 802.3at Power over Ethernet.

Notes:

- Choice of handset styles: The **Standard handset** weighs 6 oz / 170g and is thicker at the earpiece and mouthpiece than the slimline handset. The **Slimline handset** weighs 5 oz / 140g. As a reference the handset for a Cisco Unified IP Phone 7975G weighs 7oz / 210g. Standard and Slimline handsets are interchangeable at the customer sites without any change to phone firmware, locale or call control software: handset choices have been made available to cater to end user preferences.
- All of these models are ordered as spares. Licenses are sold separately either as Device License Units (DLUs) for use with Cisco Unified Communications Manager or as spare license SKUs offered for other Cisco call control systems. There are also no special channel bundles for Tier II distributors.
- None of these models are supported for use with non-Cisco third party call control

Cisco Unified IP Color Key Expansion Module

The Cisco Unified IP Phone Expansion Module extends the capabilities of the Cisco Unified IP Phones 9971, 9951, and 8961 with additional buttons and a color LCD display. This key expansion module adds 18 physical keys with access to 18 additional keys via the page keys for a total of 36 additional keys. Up to three Cisco Unified IP Color Key Expansion Modules may be used with Cisco Unified IP Phone 9971. Up to two Cisco Unified IP Color Key Expansion Modules may be used with Cisco Unfiied IP Phone 9951. One Cisco Unified IP Color Key Expansion Module may be used with Cisco Unified IP Phone 8961.

The Cisco Unfied IP Color Key Expansion Module may be connected to the Cisco Unified Endpoints 9971, 9951, and 8961 directly or in a tethered fashion.

If the supported device uses 802.3AT power, a local power supply is not required. If the supported device is locally powered or uses 802.3AF power, a power adapter must be connected and will supply power for all connected Cisco Unified IP Color Key Expansion Modules.

The Cisco Unified IP Color Key Expansion Module comes with a footstand and all necessary hardware to connect it directly to the base device. Tethered configuration requires the purchase of the tethered cord.

Ordering Information:

CP-CKEM-C=: US$495.00

Cisco Unified IP Color Key Expansion Module, Charcoal. No RTU license required. Price does not include power supply,

CP-CKEM-W=: US$495.00

Cisco Unified IP Color Key Expansion Module, White. No RTU license required. Price does not include power supply,

Optional power adapters and power cords are sold and packaged separately. For more information, see the Power Adapters and Power Cords sections on this price listing.

Cisco Unified Video Camera

The Cisco Unified Video Camera extends the capabilities of the Cisco Unified IP Phones 9971, and 9951 by adding a camera for 2 way video calling. This camera provides standard definition VGA, CIF and other resolutions for use between Cisco and selected 3rd party endpoints that use H.264 signaling. Multi-party video conferences are supported with a customer supplied Media Control Unit (MCU).

The Cisco Unfied Video Camera may be connected to the Cisco Unified Endpoints 9971 and 9951 directly or in a tethered fashion with a clip and 1.5 meter cable that are included in the package.

If the supported device uses 802.3AF power and has no other power driven accessories attached, the phone plus camera work with the threshold of Class 3 PoE. If a Cisco Unified Color Key Expansion Module or another accessory is attached, the phone requires local power via the Cisco Power Cube 4 or 802.3AT Power over Ethernet Plus.

Ordering Information:

CP-CAM-C=: US$265.00

Cisco Unified Video Camera, Charcoal. No RTU license required. Price includes clip and 1.5 cable for tethered mounting, but does not include power supply.

CP-CAM-W=: US$265.00

Cisco Unified Video Camera, Arctic White. No RTU license required. Price includes clip and 1.5 cable for tethered mounting, but does not include power supply,

Look for camera plus phone bundles listed under the Cisco Unified IP Phones 9971 and 9951 sections in this guide. **For those early adopters who purchased 9900 series phones before the bundles were available, we offer these two SKUs for a limited time only.**

CP-CAM-C-UCL=: US$85

Cisco Unified Video Camera, Charcoal, with Clip, Cable & User Connect Adjunct License for video.

CP-CAM-W-UCL=: US$85

Cisco Unified Video Camera, Arctic White, with Clip, Cable & User Connect Adjunct License for video.

Cisco Unified IP Phone Power Supply for the Cisco Unified IP Phones 8900 and 9900

Power Adapter for Cisco Unified IP Phones

Modular power cube for supplying local power to the Cisco Unified IP Phone 8961, 9951 and 9971. 100-240V, 50/60Hz, 0.38A.

Ordering Information:

CP-PWR-CUBE-4=: US$65.00

Requires one of the following power cords. These are the same cords offered for the Cisco Unified IP Phones 7900 Series.

CP-PWR-CUBE-4-M=: US$65.00

New power cube bundle available for medical facilities in regions on 200V-240V power grids. For these phones, only in cases that meet all of the criteria as stated below, a new power cube bundle is available:

- The customer is installing a Cisco Unified IP Phone 8961, 9951 or 9971
- The customer site is on a 220V – 240V power grid
- The customer site is a medical facility
- The phone is being wall mounted with the Cisco wall mount kit
- A power cube is required: Power over Ethernet is not available or not being used where the phone is being installed

In cases that meet all of these criteria only, customers must use the power cube bundle CP-PWR-CUBE-4-M= to meet regulatory compliance rather than CP-PWR-CUBE-4=. For all other use cases or regions where the power is in the 110V-140V range, CP-PWR-CUBE-4= meets international regulatory compliance.

Requires one of the following power cords. These are the same cords offered for the Cisco Unified IP Phones 7900 Series.

- **CP-PWR-CORD-AP=: US$10.00** Asia Pacific regions such as Hong Kong and Malaysia.
- **CP-PWR-CORD-AR=: US$10.00** Argentina
- **CP-PWR-CORD-AU=: US$10.00** Australia and New Zealand
- **CP-PWR-CORD-CE=: US$10.00** Europe and regions that use the same plugs
- **CP-PWR-CORD-CN=: US$10.00** China
- **CP-PWR-CORD-JP=: US$10.00** Japan
- **CP-PWR-CORD-NA=: US$10.00** North America and regions that use the same plugs
- **CP-PWR-CORD-SW=: US$10.00** Switzerland
- **CP-PWR-CORD-UK=: US$10.00** United Kingdom and regions that use the same plugs

Cisco Unified IP Phone Accessibility

Cisco has partnered with Tenacity through Cisco's Solutions Plus program. Tenacity is recognized as world leader in accessible VoIP telephony industry. This partnership ensures Cisco Unified IP Phones will be accessible now and into the future. The pricing below includes unlimited access to Tenacity accessaphone™ and ipTTY™.

Tenacity accessaphone™ is a Windows-based application that is an assistive technology for Cisco Unified IP Phones 6900, 7900, 8900, and 9900 series endpoints. accessaphone™ enables individuals with low vision or mobility impairments to have access and improved usability by providing:

- Audible Caller ID with name and number
- Audible •confirm of new voice mail
- Audible Call Log, Auto Answer
- Announces Current Calls/Phone Status
- Announces Who is on Hold
- Dialing Shortcuts
- Speed Dial, Redial, Dial From Call Log
- High Contrast Display with accessible icons and Keyboard Control

Tenacity ipTTY™ is a Windows based software application that enables with customer and internal TTY machines that provides the following key benefits:

- No analog lines required
- No text relay service required
- Supports Hearing Carry Over (HCO) and Voice Carry Over (VCO)
- Multi-lined Display
- Saves Text Conversation, Recent Calls List, and "Canned" Initial Response

For more information and information, visit Tenacity's website, http://www.accessaphone.com .

Jawbone ICON for Cisco Bluetooth Headset

The Jawbone ICON for Cisco Bluetooth Headset supports wireless, hands-free voice and call-control, across a variety of bluetooth-enabled devices.

The Jawbone ICON for Cisco Bluetooth Headset features NoiseAssassin Version 2.5 with wind reduction technology, for military-grade audio quality and performance. NoiseAssassin eliminates background noise, even in the busiest, most demanding environments.

User features of the Jawbone ICON for Cisco Bluetooth Headset include:

- Bluetooth headset and hands-free profiles, for pairing and connection with IP phones, PCs, cell phones, smart phones, and mobility devices
- Long-lasting comfort, with eight fit options standard
- Advanced Audio Distribution Profile (A2DP), for listening to streamed audio, such as podcasts and video
- Instructional gift box, for fast, easy setup
- Spoken updates in ear, which deliver Calling Line ID, remaining talk time, and more

Technical features include:

- NoiseAssassin 2.5 with wind reduction technology
- Bluetooth v2.1+Enhanced Data Rate (EDR) supports:
    - Reduced power consumption, for up to five times longer battery life
    - Improved security, with stronger passkeys to protect against undetected parties intercepting or listening to communications

Supported Cisco endpoints include:

- Cisco Unified Wireless IP Phones 7925G and 7925G-EX
- Cisco Unified IP Phones 9900 Series
- Cisco Unified Communications Clients, including:
- Cisco IP Communicator
    - Cisco Unified Personal Communicator
    - Cisco UC Integration for Microsoft Office
- Cisco Cius business tablet

4. User Connect Licensing with Unified Communications Manager 7.1(5) and later

Cisco® User Connect Licensing is a user-based licensing model for most Cisco Unified Communications 8.0 products* and future releases, including Cisco Unified Communications Essential Operate Service. With User Connect Licensing, Cisco channel partners no longer need to quote server software, device license units (DLUs), ports, options, etc.—only the number of users and public-space devices are counted and licensed. All right-to-use (RTU) fees, DLU fees, port licenses, etc. are converted to a single Cisco User Connect License.

Cisco User Connect Licensing offers customers more flexibility to license unified communications products, along with cost-effective service and support because it can be mixed with Cisco Unified Workspace Licensing. It helps ensure simple, cost-effective, and consistent pricing across the Cisco Unified Communications portfolio. For channel partners, it improves the ease of doing business with Cisco by greatly simplifying the licensing process. All these benefits result in increased efficiency and profitability for partners.

* The following products will not offer Cisco User Connect Licensing: Cisco Unified Contact Center Enterprise, Cisco Unified Customer Voice Portal, Cisco Unified IP IVR, Cisco Unified Videoconferencing, and third-party products.

For additional information regarding the advantages of User Connect Licensing (UCL) and comparative examples of pricing including DLU and UCL fees you can use with customers, consult the UCL resources page for Cisco Channel Partners at:

http://www.cisco.com/web/partners/sell/technology/ipc/integrated-solutions/user_connect_licensing.html

5. Cisco Unified Communications Software Subscription OR Cisco Software Application Support Plus Upgrades (SASU)

Cisco Unified Communications Software Subscription, a product offering that allows customers to purchase major software version upgrades at a reduced cost as a one-, two-, or three-year subscription. A valid Cisco Unified Communications Operate Services contract must be either in place or purchased with the Cisco Unified Communications Software Subscription. For more information about Cisco Unified Communications Software Subscription, refer to: http://www.cisco.com/en/US/products/sw/voicesw/ps556/products_announcement0900aecd8049ad50.html.

Cisco Software Application Support Plus Upgrades (SASU) provides services and support that strengthen the availability, reliability, and functionality of Cisco software applications to keep your business operating smoothly and enrich the value of your network investment. Focusing on the operate phase of the network lifecycle, SASU provides award-winning technical service and support. Covering more than 100 Cisco software application products in major technologies such as voice, network management, security, wireless, and storage area networking, SASU keeps you current with the applications latest updates and major application upgrade releases.

This chapter does **not** apply to Cisco Unified IP Phones or ATAs because they are hardware and not software. The Unified IP Phones and ATAs have Cisco SMARTnet® coverage available for them and refer to Chapter 5, “Cisco Services,” for additional information.

6. Cisco Services

Cisco Unified Communications Services

Gain an accelerated return on investment for Cisco Unified Communications deployments with a resilient, converged network that meets business needs. Using the Cisco Lifecycle Services approach, Cisco and its channel partners provide a broad portfolio of unified communications services that address all aspects of network deployment, operation, and optimization.

Information about how to order Cisco Unified Communications Services can be found in the Cisco Services Ordering Guide at the following location: http://www.cisco.com/en/US/partner/products/svcs/ps2961/ps2664/serv_group_home.html.

Cisco Unified Communications Services—Tools for Quoting and Ordering

Cisco Service Contract Center

Cisco Service Contract Center, the next generation of service management, helps you increase profitability and efficiency by simplifying the way you manage and sell your Cisco service contracts.

Now there is one simple and easy-to-use Web-based solution you can use to quote and book your service orders and manage your service contracts and renewal opportunities. Cisco Service Contract Center helps you accelerate your business by allowing you to focus your attention on selling and on servicing your customers instead of waiting for reports, searching for information, reconciling prices, reentering quotes, solving problems, and cleaning up contracts.

Access the Cisco Service Contract Center at the following location: http://www.cisco.com/public/scc/.

7. Cisco Systems Capital Financing

The significant benefits offered by Cisco Unified Communications make it the natural choice to replace traditional PBX systems. As with any technology investment, the question is the affordability of the new system. The answer is financing from Cisco Systems Capital. Whether through flexible repayments matching expenditure to benefit, mitigating cash-flow problems, or negating capital expenditure with an operating lease, we can give you access to the right Cisco Unified Communications technology for your business, right when you need it.

Removing Sales Barriers

Typically, Cisco Systems Capital can help remove or reduce the barriers preventing organizations from obtaining the technology that can most benefit their businesses. Cisco Systems Capital can:

Remove cash-flow problems, allowing the company to spread the cost of its investment over a number of years.

Offer flexible repayment terms matching expenditure to benefits, which means that payments can be timed to coincide with business benefits that may be seen later in the project, or deferred to meet a company's budget cycle.

Turn capital expenditures into operating expenditures through an operating lease that allows companies to benefit from the residual value of the technology upfront and because no one knows Cisco equipment like Cisco, you can be sure of market-leading residuals.

Provide a sale and lease-back arrangement (where available) that softens the initial costs by taking on existing commitments that may be attached to legacy equipment.

Tips for Taking Advantage of Financing to Accelerate and Close More Business:

Consider financing early in the deal cycle: This will save time later and help get you paid faster.

Get your customer preapproved for a credit line with Cisco Systems Capital: By showing the customer they can afford more than they though they could, you can pave the way early on for growing the deal size. It is recommended you do this as early as possible in the customer discussions/deal cycle.

Provide a lease quote with every proposal: You can do this by contacting your local Cisco Systems Capital team. And, in some markets, Web-based tools are available so you can quickly generate your own lease quotes.
